

CipherPoint Software Delivers Support for SharePoint 2010

CipherPoint Provides Transparent Encryption and Content Security for SharePoint 2010 and 2007

March 17, 2011, Austin, TX: CipherPoint Software today announced the immediate availability of CipherPointSP and CipherPointSP Enterprise for SharePoint 2010. By providing support for both SharePoint 2007 and 2010, CipherPoint's solutions now address compliance and security concerns irrespective of the version of SharePoint deployed at customer sites. Sharepoint administrators, integrators and ISV's can expand the use cases for SharePoint, by delivering new SharePoint 2010-based solutions for regulated or confidential information. In addition, integrators can continue to enhance security of SharePoint 2007 sites by adding CipherPoint's transparent content encryption software. CipherPoint's transparent encryption solutions support encryption of content stored in SQL databases, and in remote BLOB storage.

"SharePoint users with sensitive information to protect, or compliance requirements to meet, can now benefit from CipherPoint's transparent encryption approach regardless of what version of SharePoint is in use" said Mike Fleck, CipherPoint CEO. "Many of our customers are planning deployments of new SharePoint sites based upon SharePoint 2010, and by providing our products on this platform, CipherPoint enables them to confidently implement 2010 while addressing security concerns related to sensitive and regulated information."

"Support for SharePoint 2010 enables Prinomic to confidently position CipherPoint's data security solution to our existing customers, and in new projects where SharePoint 2010 is required," said Torsten Volk, CEO, Prinomic Systems. "Prinomic can address a broad range of security and compliance requirements using CipherPoint's transparent encryption, including customers with SQL storage, and customers with remote BLOB storage."

More information on CipherPoint's transparent content encryption solutions for SharePoint 2007 and SharePoint 2010 may be obtained at:
